

Custom Designed Transporter Static Rack

Outer Dims: L- 117 inches W- 102 inches H-22.5 inches
Inner Dims : L -115 inches W- 98 inches H-20 inches

27 – 4 inch diameter galvanized rollers

Heavy Duty welded steel frame

15,000 pound capacity

Rack is designed to integrate with a transporter to allow for approximately 10 inches of pallet overhang which enables the operator to pick up and drop off ULD's without ramp agent assistance. Immediate return on investment is through reduced labor costs and improved safety practices. Design includes front forklift slots for expedited load/offload of pallets. Heavy duty all welded steel construction that is built to last for generations.
